

Open Programs – Finance

With more than 50 years of experience, Aalto EE provides comprehensive training in accounting, insurance, risk management, banking and finance. Our programs offer added value for executives and professionals within these industries and beyond, building financial knowledge and expertise.

We specialize in providing strategic, up-to-date, and, in some cases, legally required training. As an agile partner to organizations, we help develop skills needed for achieving business objectives, supporting sustainable growth, and managing risks. We also support individuals in achieving their career development and professional goals.

Themes

Insurance

Vakuutustutkinto, VTS

VTS provides the basis for any specialist or professional working in the insurance industry.

The Diploma in Insurance (VTS) is an exam-based program. By demonstrating skills in various topics relevant to the industry, the participant will gain the title VTS. The participant will need to pass eight exams on topics like risk management, basics of insurance, economics for insurance, and marking in the insurance industry. The exam is done in Finnish.

Ylempi vakuutustutkinto, YVTS

After completing the program successfully, you can use the degree title YVTS (Advanced Insurance Examination).

The Advanced Insurance Examination (YVTS) program is designed for professionals in the highly regulated insurance industry; it supports and further develops insurance professionals' expertise. The program embeds theory with examples from industry and establishes a strong connection between regulatory knowledge and hands-on experience.

Publications

Publications

Strengthen your knowledge of the insurance business

The books help you to familiarize yourself extensively with the insurance industry and different lines of insurance. The books are intended both as textbooks for students and as manuals for experts.

Most books are in the exam requirements of a Diploma in insurance. You can buy printed books or e-books.
